

Talha Özer

Full Stack Software Developer

As a dynamic and experienced Full Stack Software Developer, I specialize in .NET and React. In general, I develop web and desktop based applications using .NET technologies. I always like to use the latest and most different technologies in my projects. I try to follow design patterns and teach myself new things in every project. I have been involved as a developer in many projects from e-commerce to corporate web projects, from corporate web projects to business solutions. With my passion for motorsports, I am a professional dedicated to continuous learning and self-improvement in fast-paced environments.

Work History

2023 Sep -
Current

Full Stack Software Developer

Bimser Software, Başiskele, Kocaeli, Turkey

As a developer of the company's own product eBA, I played an important role in the development and maintenance of the back-end and front-end parts. I was involved end-to-end in the development of the new version of eBA, eBA Plus.

2022 Oct –
2023 Sep

Full Stack Software Developer

Genbil Software, Ümraniye, İstanbul, Turkey

I worked in the development team of HumanSoft, the company's Microsoft Dynamics 365 CRM-based software product. In this context, I intensively developed workflows and add-ons. I also took part in Microsoft Dynamics 365-based international private customer projects as a full stack developer and developed different integrations and systems.

2021 Jun –
2022 Oct

Software Consultant

Bimser Software, Başiskele, Kocaeli, Turkey

In the eBA and Synergy products developed by the company, I carried out the analysis, development and maintenance of incoming requests in line with customer needs from start to finish. I also took an
